Surface Chart for 15 Feb

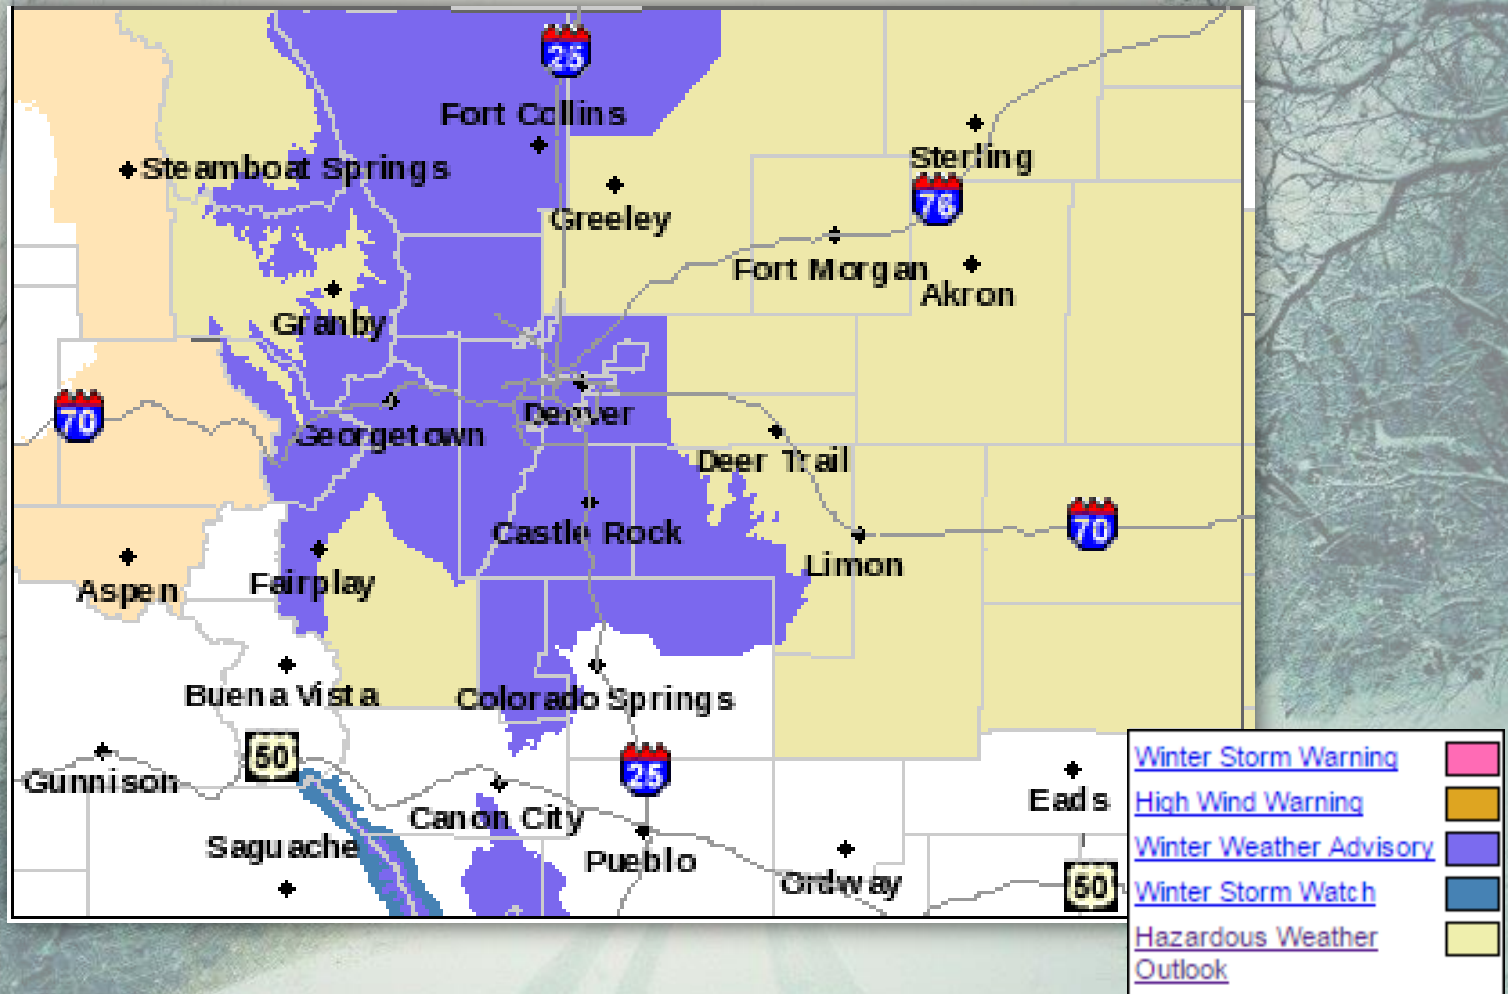

- Cold Front moving through during early part of Sunday
- Upslope N to NE winds will form behind the front
- Cooler temperatures with snow starting during the late morning
- Due to colder airmass along with cloud cover high temperatures will only reach the lower 30s over the plains.
- Another disturbance tomorrow will bring additional snow to NE CO.

Snow amounts through Tuesday

- Models show high amounts of moisture with cooler air moving in behind front that will aid in snow formation this afternoon and evening
- Amounts will be updated through the NWS Denver/Boulder webpage and social media

Winter Weather Advisory

Winter Weather Advisory will go from noon today to 6 pm Monday.
Storms will produce 6-12" for the Mountains/higher Foothills & 3-6" for the plains

What if I am traveling over the Mountains this weekend and Monday?

- Travel into the high country including I-70 will become hazardous Sunday evening and into Monday morning.
- Slushy snow will turn to ice overnight into Monday creating hazardous driving conditions for morning commutes.
- It is imperative that you allow yourself extra time for your Monday morning travel.
